 ■ 1 hour to collaborate 2-8 people recommended

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

Problem

How might we detect and control Gas leakage that leads to various accidents resulting into both financial loss as well as human injuries

Ashfaq A

Brainstorm

Alerting Through Call

Through SMS

Sound

leak sensor detect and give buzzer sound

Take turns sharing your ideas while clustering similar or related notes as you go.

In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger

than six sticky notes, try and see if you and break it up into smaller sub-groups.

Control of gas supply

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
